PATENT EXAMINER

DETAILED ACTION

1. This action is in response to the papers filed October 13, 2004. Currently, claims 2-4, 7-27 and 35-43 are pending.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance.

The instant claims are neither taught nor suggested by the prior art.

For example, Staub et al. (US Pat. 6,187,540, February 2001) as evidenced by Gibco BRL Products Catalog (FTA Card, page 2-7, 1999) and Burgoyne (US Pat. 5,496,562, March 1996) which teaches the use of a buccal swab to collect saliva does not contain any upstream processing of a biological sample to produce a suspension comprising cells. There is no upstream processing of a biological sample to produce a suspension which is then applied to the first solid medium.

Kathariou et al (US Pat. 6,503,747, January 2003) teaches a method of genetic analysis which comprises using a first solid medium and a second solid medium for transfer of the genetic material/cells. The prior art teaches that the second solid medium is presoaked in a buffer. The instant claims have been amended to require that the solid medium is a dry solid medium. The prior art does not teach or suggest a method of using a second solid support which is a dry solid medium.

The prior art does not teach or fairly suggest all of the limitations of the instant claims. Thus, the claims are allowable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
